

Software and Computer Systems Company, LLC
Software License Agreement for *Scannerz*
Single User License

Please read this license agreement carefully. This license agreement will be referred to throughout this document simply as the "license". If you do not agree with the terms of this license, do not use this product. By using this product, you are agreeing to be bound to the terms of this license for the ***Scannerz*** distribution including all binaries and documentation. When referring to the ***Scannerz*** distribution, it includes any and all other items in the package, including other applications, such as the ***Installer*** that may be included in the distribution.

The terms of this license are as follows:

1. This is a single user license, meaning the software is to be installed and/or used on on a single system and used by a single user. The user may install multiple copies of this product on a single machine, but the use and access of ***Scannerz*** must be limited to that of the licensed user only. The user can make copies of any and all components comprising ***Scannerz*** for archiving purposes only and not for free or commercial redistribution by any means.
2. Software and Computer Systems Company, LLC holds and owns any and all copyrights and patents associated with any and all components comprising this product. Patent claims may be based on active, pending, or contemplated actions by Software and Computer Systems Company, LLC. The licensee may print out any of the manuals included in this product for their own use, but they may not copy, edit, or extract portions of these components and claim them to be part of their own, or someone else's work. It is expressly forbidden to decompile, reverse engineer, disassemble, modify, or create derivative works using any components comprising the ***Scannerz*** product.
3. This software is not intended for use in the operation of any equipment where the failure of this software could lead to personal injury, death, damage to property, or damage to the environment. This software is not intended for use in such things as flight control systems, air traffic control systems, 911 services, the operation of nuclear facilities, the operation or control of medical equipment including but not limited to life support systems, aircraft navigation systems, or any other systems where the failure of this software could cause significant damage or death
4. Licensees are allowed, during a system upgrade, whether it be partial or complete, to transfer this software in its entirety to the targeted updated machine or its media, provided that once the transfer is complete the copies on the older machine or media are removed and destroyed and access to other users is prohibited. This type of transfer is valid only if the licensed user accessing the upgraded machine or media is the same individual that was accessing the software on the old machine or media prior to the upgrade.
5. This license may be transferred from one licensed user to another provided that the original licensed user completely removes and destroys any and all copies of any components comprising ***Scannerz*** they may have in their possession once the transfer to the new licensee is complete. Upon reception of the transferred software, the recipient becomes the new licensee and must agree to be bound by the terms of this license agreement before installing and using the product. If they

do not wish to be bound by the terms of this license agreement they should either return the software to the original licensee, hence returning the license, or completely destroy all components of the copy of **Scannerz** they may have in their possession.

6. No user may not sell, rent, lease, lend, redistribute or sub license any components of the **Scannerz** distribution.

7. This license will be considered terminated by the licensee if they remove all portions of the distribution from all systems and destroy all copies of such distributions in their original or modified form, complete or incomplete, that may exist as archives or as backups.

8. This license may be terminated at any time by Software and Computer Systems Company LLC in the event it becomes clear that the terms of this license have been violated. If a license is terminated by Software and Computer Systems Company LLC, then any and all licensees associated with the violation that have the product stored on systems they have access to must stop using the product upon notification of such a license termination. This includes recipients of the product that received the product via distribution tactics that violate the terms of this license. Software and Computer Systems Company reserves to right to enforce the removal of all portions, complete or incomplete, of the product **Scannerz** from any systems that may be storing it for end user use, archival, or backup purposes.

9. If this product is upgraded with a newer version, the licensee may retain the original copy or copies of **Scannerz** and continue to use them if so desired, but the product subjected to the update may not be transferred to another user unless that user purchases a license for the product.

10. The product **Scannerz** is licensed on an "as is" basis and there are no warranties, express or implied, regarding the particular fitness of this product for any given task or tasks. By accepting this license, the licensee and their employer, if applicable, agree to accept any and all risk and losses of any form that may be associated with using this product.

11. The product **Scannerz** and any of the components comprising the product may not be exported outside of the United States of America by anyone other than Software and Computer Systems Company, LLC.

12. This license will be governed by and interpreted in accordance with the laws of the State of Virginia.
